Kangaroo Island's Unique Biodiversity

Love Shines Through

Kangaroo Island Young Writers

“I want to plant
little native
forests on
Kangaroo
Island.”

Why?

Because trees
make our air
cleaner.”

Ollie Dawes - Age 7

ECHIDNA DISCOVERY ハリモグラの発見

Dr. Peggy Rismiller,
world authority
on ECHIDNAS,
shares her
EXPERTISE at
Teasdale's Place.

USING EXPERTS

How did the Teasdale's Place happen?

"It was an evolutionary process, a journey of learning.

進化過程

学習の過程

It began with a desire to live more sustainably;

To live out our ESD convictions

The vision slowly evolved when we found suitable land on Kangaroo Island.

Beautiful land that needed to be restored.

We drew on our life's experiences;

it has become a journey of 'life-long learning'.

生涯学習

We are still learning!

Many people have helped us and taught us on the way.

We have learnt a lot from the mistakes we have made."

間違い

*"Our vision is still evolving and changing:
every time visitors come there is a process of two-way learning
双方向学习
And for us it is the delight of being involved in life-long learning".*

Jennie & Bob Teasdale

Pelican Lagoon, Kangaroo Island, October 2014
